

Universal Coving

a Z-Group Enterprises LLC Product

Product Image:

Product Description

Universal Coving features an easy to install base and easier to install Cove. **Universal Coving** has two heights to address the need for a tighter seal or to overcome a less than ideal surface. The soft edge of the **Universal Coving** seals against the surface of the walls, floor, and ceiling to eliminate the inside 90° corners. Without inside corners it is easier to clean and maintain your cGMP or other critical environments. Using **Universal Coving** in your facility will help eliminate micro-organisms from building and spreading; decrease cleaning time; increase effectiveness of cleaning procedures; and will help your facility comply with cGMP standards and recommendations.
